
VAISHNAVI THOTTUPURATH VASU

Bounds Green, United Kingdom N11 QU | 07919265779 | vaishnavivaishu115@gmail.com

Professional Summary

Results-driven QA Automation Engineer with 8+ years of expertise in designing, developing, and executing scalable test automation frameworks for Web, API, and performance testing. Specialized in Behaviour-Driven Development (BDD) using SpecFlow and Cucumber, with advanced skills in Selenium WebDriver, Rest Assured, Postman, JMeter, Cypress, and BrowserStack for cross-browser/device coverage. Proven success in migrating legacy frameworks, optimizing CI/CD pipelines (Azure DevOps), and integrating automation into complex delivery ecosystems. Experienced across Healthcare, Telecommunications, and Finance domains, delivering high-quality, defect-free releases through full-stack automation (UI/API/DB/Performance).

Professional Experience

QA Automation Engineer

Oxfam GB – United Kingdom | Nov 2022 – Present

- **Migrated** legacy **Java Selenium** frameworks to **.NET Selenium**, architecting reusable and modular automation solutions for **UI and API testing**.
- Developed **API automation suites** with **Rest Assured** and **Postman**, validating complex JSON/XML payloads, schema compliance, and API chaining for multi-step workflows.
- Engineered **hybrid automation frameworks** integrating **Selenium WebDriver**, **Rest Assured**, and **JMeter**, achieving **80% reduction** in manual regression execution.
- Implemented **BDD frameworks** (SpecFlow, Cucumber) with step definitions mapped to modular, reusable test components, improving maintainability.
- Automated **end-to-end donation processing workflows**, **corporate high-value transactions**, and **listing tools**, ensuring functional accuracy across UI, API, and database layers.
- Created **CI/CD integrated automation pipelines** in **Azure DevOps**, with automated triggers on pull requests and nightly regression runs, reducing release cycles by **90%**.
- Designed **JMeter performance/load test plans** simulating **real-world concurrency**, detecting API bottlenecks and optimizing database query performance.
- Conducted **accessibility testing** (Lighthouse, BrowserStack) ensuring **WCAG 2.1 compliance** for web applications.
- Performed **ServiceNow defect lifecycle management**, handling production issue triaging, RCA, and resolution tracking.
- Mentored junior engineers on **API testing with Rest Assured**, **UI test automation design patterns**, and **CI/CD integration best practices**.

Tools/Technologies:

.NET Selenium, Java Selenium, Rest Assured, Postman, JMeter, SpecFlow, Cucumber, Azure DevOps (Pipelines, Repos), Git, ServiceNow, Accessibility Testing Tools, TestNG, NUnit, XPath/CSS Selectors, JSON/XML, Cypress, JavaScript.

Key Achievements:

- Reduced manual regression cycles from **3 weeks to 2 days** via complete **API + UI automation integration**.
- Delivered **high-volume EPOS till automation** under tight deadlines, detecting defects **3 sprints earlier** than manual cycles.
- Improved release quality and **reduced post-release defects by 40%** through early API defect detection.
- Awarded "**Superstar of the Week**" for mission-critical high-volume testing automation.

Test Analyst

Cognizant Technology Solutions | Jun 2015 – Aug 2021

- **Functional & Regression Testing:** Extensive experience in validating application functionality using both **manual** and **automation** approaches, ensuring full coverage of business requirements.
- **Automation Development:** Proficient in building and maintaining **Selenium WebDriver** frameworks (Java/.NET) and **QTP/UFT** scripts, applying **modular design patterns** for maintainability and scalability.
- **API Testing:** Skilled in **SOAPUI** and **Rest Assured** for SOAP and REST API validation, including **WSDL/XSD verification**, **JSON/XML schema validation**, and **API chaining** for end-to-end workflows.
- **Performance & Load Testing:** Experienced with **JMeter** for simulating concurrent user loads, identifying performance bottlenecks, and recommending optimizations.
- **Test Case & Plan Design:** Highly skilled in developing **data-driven**, **BDD**, and **modular test cases** aligned with functional specifications and user stories.
- **Defect Management:** Proficient in **HP ALM/Quality Centre**, and **JIRA** for logging, tracking, prioritizing, and managing the full defect lifecycle.
- **Cross-Browser & Cross-Device Testing:** Hands-on experience with **BrowserStack** and real device labs to validate application behaviour on multiple browsers, operating systems, and devices.
- **Agile/Scrum Testing:** Active participation in sprint planning, backlog grooming, and daily stand-ups, delivering iterative test coverage in fast-paced Agile environments.
- **Exploratory & Usability Testing:** Adept at identifying UI/UX issues beyond scripted scenarios, ensuring a seamless and intuitive user experience.
- **Integration & Compatibility Testing:** Validating seamless interoperability across systems, APIs, databases, and third-party integrations.
- **Acceptance & UAT Testing:** Collaborating with business users to verify that solutions meet functional, performance, and usability expectations.
- **Root Cause Analysis (RCA):** Investigating defects at code, API, and data levels, providing detailed technical reports to facilitate rapid resolution.
- **Reusable Script Libraries:** Created and maintained **custom automation utilities** and shared libraries, reducing redundancy and improving test execution efficiency.
- **Continuous Improvement:** Actively refactoring automation code to remove flakiness, improve synchronization handling, and optimize execution speed.

Tools/Technologies:

.NET Selenium, Java Selenium, Rest Assured, Cucumber, ServiceNow, Accessibility Testing Tools, TestNG, N Unit, XPath/CSS Selectors, JSON/XML, SOAPUI, Java, C#, Agile/Scrum, Sprint-based delivery, Waterfall model

Education

Bachelor of Computer Applications	Jun 2015
Amrita school of Arts and Sciences	India
Master of Science: Supply Chain management	2023
Anglia Ruskin University	Chelmsford, Unitec

Professional Development
